

PLASTIC EXTRUSIONS

Sur-Seal supplies extrusions to a wide range of industries. Our expert engineering skills and advanced manufacturing capabilities enable us to provide anything from simple tubes to complex profiles. Sur-Seal is your one-stop source for any plastic extrusion projects.

Key capabilities

- Co-extrusion and dual durometer production
- Tooling design to meet your specifications
- Complete selection of thermoplastic materials
- Secondary operations that include CNC machining, forming, notching, drilling and sawing
- Custom packaging and labeling
- Convenient stocking programs
- Full-range choice of colors

Key materials

- ABS
- Acrylic
- Butyrate
- Flexible PVC
- PETG Co-polyester
- Polycarbonate
- Polyethylene
- Polypropylene
- Polyurethane
- Rigid PVC
- Thermoplastic elastomer
